**Subject:** Microsoft Settlement

Having a Mac allows me to avoid the Windows OS. My operating system came with both Explorer and Netscape. However, when clicking a link or attachment the default goes to Explorer. This is, of course, only a tiny example of Microsoft domination. Since I try to avoid any Microsoft product and do not wish to be forced to use one, I trashed it. Unfortunately, it is impossible for most PC users to find software other than that made by Microsoft. Please make it possible to improve our computer technology by giving competition a chance.

Sincerely,

Dianne Lane
